The screenshot shows a user interface for a UI design tool. At the top, there's a navigation bar with tabs for Design, UI Integrate, Database, Backend, and Deploy. On the far right are icons for Publish, a bell, a lightbulb, and an eye.

The main workspace is titled "App". It features a sidebar on the left with sections for Workspace, Layers, Assets, and Screens. Under Screens, there's a tree view of "Auth Module" with "Screen 1" expanded, showing "Low-level frame", "Top-level frame", "Hello", "Submit Button", "Todo Input Field", and "Todo List" with three items. There are also "Screen 1" and "Screen 2" listed under "Auth Module".

The central area displays a "Create your account" screen. It includes fields for "Full Name", "Email", and "Password", and a "Create an Account" button. Below the form is a note about terms of service and privacy policy. At the bottom, there are links for "Have an account? Sign In" and "Forgot Password".

On the right side, there are several panels: "Auto Layout" with options for horizontal and vertical spacing, "Appearance" with color and font settings, and "Fill" with a color picker set to F5F5F5. At the bottom, there's a timeline with frames for 3.5 S and 6.2 S, and buttons for Editor, Animate, and Prototype.

AI Workshop

Welcome! Let's set up your deployment workflow. I'll handle the full design and connections—I just need a few details to get started.

10:25 ✓

Which project are we configuring today?

App (mobile/SPA)

WebApp (full-stack)

Backend (shared microservices)
